

DELTEX

You will be working as a chemicals professional, conducting root cause analysis and environmental data analysis and assessing the performance of factories in Asia in line with the company's procedures and guidelines. When reporting your findings, you will identify areas where improvement is needed and act accordingly. You will act as the bridge between all parties, striking a balance between the interests of customers, stakeholders, the manufacturer and the company.

Chemical Textile Engineer

We are looking for a Chemical Textile Engineer to join our internal sustainability team in Hamburg. We are seeking someone with a solid background that combines textile chemical management, structure and properties with textile quality assurance, plus substantial hands-on experience and expertise in managing environmental projects in Asia.

Your main responsibilities

- Based on the Detox Commitment and the Zero Discharge of Hazardous Chemicals (ZDHC), you will carry out assessments of formulae and chemical inventory
- You will arrange chemical management training (e.g. chemical handling, chemical inventory, root cause analysis) for our manufacturers, focusing primarily on those in Asia
- You will help the team develop a quality assurance programme on the basis of the customer's Restricted Substance List (RSL), while leveraging root cause analysis tools to understand the impact of textiles on product failure.
- You will be responsible for linking the chemical, physical and mechanical properties of fibres, textiles and flexible composites to garment performance

Key requirements

- More than 2 years' experience in a similar position as a chemical textile engineer or textile quality assurance manager, with significant exposure to the garment industry, would be advantageous
- University degree in textile engineering, textile chemistry or similar
- Some work experience within the Asian market would be preferable
- Self-motivated, proactive, resourceful, result-oriented, detail-minded
- Good, up-to-date practical analytical, communication and organisational skills
- Proficiency in MS Office applications: Word, Excel, PowerPoint and Outlook
- Good command of written and spoken English and Mandarin. Some German would also be an advantage.
- Willingness to travel in Asia

Deltex offers

- Attractive salary package
- Opportunity to work in a fast-growing, dynamic environment
- Close interaction with overseas buyers, our global sustainability team and vendors in the China and Asia regions

Please send us your application documents (incl. cover letter, CV and relevant certifications). Please also specify your earliest possible start date. Apply via email to: corinna.munzel@deltex.de
