

**North Carolina State University College of Textiles
offers two internationally respected doctoral programs leading to
PhD in Fiber and Polymer Science and
PhD in Textile Technology Management**

Almost all students currently enrolled in the two PhD programs receive some form of assistantship (either Teaching Assistantship or Research Assistantship). Further information on these programs can be found at:

<http://www.tx.ncsu.edu/academics/degrees-and-programs/graduate/>

The College will be offering several **additional** new research assistantships to students entering the PhD programs in fall 2014.

These research assistantships will consist of a stipend of up to \$20,000, tuition and health insurance. These will be awarded to students who have been accepted into the programs and the selection will be based on the quality of student application – including academic record, experience, references, together with the match between the student's interests and the research focus of faculty in the college. All accepted students will be considered, and those who have been awarded assistantships will be notified by the end of May 2014.

All applications must be submitted electronically and details of the process and requirements can be found at: <http://www.ncsu.edu/grad/future-students/index.php>

If further information is required please contact:

W. Oxenham, Associate Dean for Academic Programs woxenham@ncsu.edu
