

Horizon Europe

funding opportunities for
your research 2021 – 2028

Series of short webinars
with Radka Pittnerova
introducing the programme
to newcomers

Starting from
4th March 2021
on ZOOM

Why?

Horizon Europe is a seven-year-long programme funding European research. Because of its complexity, one can easily become overwhelmed by the amount of information related to it.

For this reason, we have prepared a series of short webinars explaining the programme to researchers of any career stage who want to understand its principles. Understanding the logic of Horizon Europe will help you to better identify those funding opportunities that are relevant to you.

When and what?

We start on March 4th 2021. Every week we will hold one 45 – 60 minutes long webinar. The first four topics are:

- | | |
|-----------------------------|---|
| 4 th March 2021 | Brief introduction to Horizon Europe |
| 11 th March 2021 | Terms, concepts and information resources that you need to understand in Horizon Europe |
| 18 th March 2021 | European Research Council and types of projects |
| 25 th March 2021 | Mobility support within Horizon Europe |

If you want to register for any of our webinars, use the links above.

The Czech Ministry of Education, Youth, and Sports financially supports our consulting and training activities (project nr. LT119003). This is the reason why we can provide our services to the researchers that work or study in the Czech Republic free of charge.
